

Quality- and Environmental Policy

Skultuna Flexible AB is a major manufacturer of laminated and coated products of metalfoil, polymer film, paper and card board, designed for industrial applications and packaging.

It is Skultuna Flexible's aim to promote only products, which are of such quality that they deserve to win customers complete satisfaction by performing the expected function in a reliable and safe manner.

We are constantly working to improve our environmental work based on the recycle principles. Our goal is to increase the utilization rate of raw materials, purchase and deliver certified FSC-mix products, prevent and reduce emissions of pollutants and to increase the recycling of waste products.

Legislation and external regulations applicable to the company's activities, should be regarded as a minimum requirement.

Through information, education and taking advantage of each employee's experience, we will make all concerned aware of their opportunities to personally contribute to environmental and quality improvements in the organization.

Skultuna, April 5 2016

Kaj Falkenlund
CEO
